

| SET OF PARAMETERS                      | UNIT OF MEASUREMENT | VALUE            |
|----------------------------------------|---------------------|------------------|
| MACHINE TYPE                           |                     | CYLINDER CRUSHER |
| POWER SUPPLY                           | V                   | 380              |
| ENGINE POWER                           | kW                  | 7,5              |
| ENGINE SPEED                           | rpm                 | 1415             |
| FIXED CYLINDER SPEED                   | rpm                 | 460              |
| TRANSMISSION BETWEEN WORKING CYLINDERS |                     | 1/1              |
| CYLINDERS DIAMETER                     | mm                  | 268              |
| USAGE WIDTH OF THE CYLINDERS           | mm                  | 220              |
| EFFICIENCY                             | kg/h                | 750              |
| BUCKET CAPACITY                        | kg                  | 80               |
| SIZE                                   |                     |                  |
| - HEIGHT                               | mm                  | 1280             |
| - WIDTH                                | mm                  | 680              |
| - LENGTH                               | mm                  | 1210             |
| GRAIN COMPACTOR WEIGHT                 | kg                  | 290              |
| USAGE                                  | BY PEOPLE           | 1                |
